📍 Belgrade

EXPERIENCE

Blockchain Developer

Woonkly 📅 05/2021 📍 Woonkly, Cancun

- Spearheaded the development of blockchain solutions for financial services, improving encryption and scaling transaction throughput by 40%
- Orchestrated end-to-end blockchain initiatives, leading cross-functional teams to implement agile methodologies.
- Enhanced smart contract functionalities, resulting in a decreased error rate of 20% and optimized deployment strategies.
- Developed extensive training materials and conducted workshops, upskilling the team in blockchain innovations and best practices.

Solidity developer

Blitz Labs 📅 01/2022 - 03/2023 📍 Madrid

- Created robust decentralized applications and leveraged Truffle and Hardhat for various blockchain projects
- Led integration of Web3.js with front-end technologies, improving user adoption and interface fluidity.
- Conducted audits of smart contracts to ensure compliance with industry standards, reducing vulnerabilities by 25%.

EDUCATION

Bachelor of Science

University of Belgrade 📅 04/2014 - 03/2018 📍 Belgrade

COMPLETED PROJECTS

IdentiBlock Secure

📅 08/2021 - 02/2022 📍 Remote

Decentralized identity management on Ethereum

- Created IdentiBlock Secure, a system that empowers users to manage their digital identities without third-party reliance, utilizing Ethereum and IPFS. The project enhanced privacy and security using Solidity and React, achieving a 90% user satisfaction rate by reducing identity theft risks.

ChainGuard Transparency

📅 03/2022 - 06/2023 📍 Remote

Blockchain platform for supply chain transparency

- Developed ChainGuard Transparency, a platform leveraging Hyperledger Fabric to enhance transparency and traceability in supply chains. The system tracks products from origin to consumer, implementing smart contracts to improve efficiency and authenticity, resulting in a 30% increase in operational efficiency and reduced counterfeit goods.

SUMMARY

Dynamic and detail-oriented Senior Blockchain Developer from Serbia with comprehensive experience in designing, implementing, and managing blockchain networks and solutions. Proficient in programming languages such as Solidity, Rust, and Python, specializing in smart contract development and decentralized application engineering. Demonstrated success in delivering secure and scalable solutions in an agile environment by leading client-centric project initiatives.
